PROJECTS

AI Powered Loan Assistant Github	Present
<ul style="list-style-type: none">Developed an AI-powered loan chatbot system that can be seamlessly integrated into any application to automate the end-to-end loan processing workflow.The system leverages a Master-Worker Agent architecture, where the Master Agent manages user interactions and decision flow, while specialized Worker Agents handle loan eligibility checks, document verification, and loan sanction processes.	

College Survey - AI Survey Application Github	2025
<ul style="list-style-type: none">Automated AI-based survey and query-resolution application for college users, enabling students to directly interact with a chatbot (CollegeBro) to get answers to college-related queries.The system maintains a seamless data flow while collecting user inputs and provides personalized suggestions for freshers entering college. It also enables college management to view summarized insights and survey results generated by the chatbot.
